Application No. 10/657,860 Amendment dated September 16, 2005 Reply to Office action of 06/16/2005 Page 2 of 7

## **LISTING OF CLAIMS**

- 1. (Currently Amended) A wipe, comprising consisting essentially of:
  - a. a porous and bulky thermoplastic non-woven partially bounded thermoplastic carrier web;
  - b. an absorbent non-woven web including a plurality of philic <u>thermoplastic</u> fibers having a first side and an opposite second side, the first side disposed adjacent the carrier web, the absorbent web co-extruded and secured to the carrier web at a plurality of thermic embossments; and
  - an a fibrous meltblown abrasive finish consisting essentially of thermoplastic fibers applied to the second side of the absorbent non-woven web, the abrasive finish including a plurality of abrasive fibers that are less than 40 microns in diameter.
- 2. (Original) The wipe of Claim 1, wherein the plurality of abrasive fibers have an average diameter that is substantially 15 microns.
- 3. (Original) The wipe of Claim 1, wherein the porous nonwoven carrier web comprises a carded web partially bounded thermoplastic.
- 4. (Original) The wipe of Claim 1, wherein the porous non-woven carrier web comprises a thermoplastic.
- 5. (Original) The wipe of Claim 4, wherein the porous non-woven carrier web comprises between 20 per cent to 50 percent bi-component low melting temperature fibers.
- 6. (Original) The wipe of Claim 5, wherein the bi-component low melting temperature fibers comprise absorbency treated polyethylene and polypropylene.
- 7. (Original) The wipe of Claim 4, wherein the porous non-woven carrier web has a weight of between 9 grams per square meter and 50 grams per square meter.

- 8. (Original) The wipe of Claim 1, wherein the absorbent non-woven web comprises a thermoplastic.
- 9. (Original) The wipe of Claim 8, wherein the absorbent non-woven web has a weight of between 9 grams per square meter and 50 grams per square meter.
- 10. (Original) The wipe of Claim 1, wherein the abrasive finish comprises a thermoplastic copolymer.
- 11. (Original) The wipe of Claim 10, wherein the abrasive finish has a weight of between 8 grams per square meter to 20 grams per square meter.
- 12. (Original) The wipe of Claim 1, further comprising an embossment applied to the porous non-woven carrier web, the absorbent non-woven web and the abrasive finish.
